Press the indicated button for 3sec. as shown below. The power LED will turn ON and stay on.

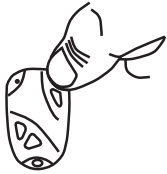

Follow the same steps to turn OFF.

Video Recording:

Press the indicated button for 3sec. as shown below. The power LED will blink 3 times and will stay OFF. Even though LED is off, it is still recording.

To stop recording press the same button for 3sec. and the LED will turn back ON.

Battery Charge:

Battery will be completely charged in about 2 Hours.
Recording/Snapshot Time: 1Hour.
Standby: 130-150 minutes

Snapshot Size: 170KB/pic approx.
Video Size: 750KB/s approx. up to 6 Hours.

Snapshots:

To take a snapshot, make sure DVR is not recording. The power LED will blink once and will stay ON. and press the indicated button ONCE.

Once the LED is solid orange, it is ready for the next shot.

Day/Time Setting:

YYYY/MM/DD, HH,MM,SS

To change DAY/TIME settings, create a TXT file and save it under the name "settime" into the DVR main folder.

```
settime - Notepad
File Edit Format View Help
2010.02.15 12:56:00
```

Unplug the DVR from the Computer and the Next recorded video will have the updated Date and Time.

Playback:

Connect the Mini DVR to the computer using the USB cable. The system will automatically recognize the DVR as a SD card reader. Just click on the Folder and see pictures and Watch videos using your favorite Video Player.
